-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 8, there is no antecedent basis for "the hook member base portion".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nestgard (U. S. Patent No. 4,894,060, cited by applicant). Nestgard ('060) discloses a unitary film structure of a polymeric resin (see column 7, lines 44-45) comprising a base film layer (53, see Fig. 8) having generally parallel upper and lower major surfaces having projections (57) being arranged in rows with at least 25 spaced projections per centimeter (prior to stretching, as shown in Fig. 8, where the spacing between adjacent projection are represented by respective slits therebetween, the spacing/slits occurring at intervals of "0.024 centimeters", therefore resulting in approximately $41.6\bar{6}$, i.e., $1/0.024$ cm., projections per centimeter in a row) in a row projecting from at least the upper surface of said base;

(concerning claim 2) the projections are hook members (14) which have head portions that extend in a direction transverse to the direction of rows of the hook members (see Figs. 1 and 8);

(concerning claim 3) the unitary hook fastener having at least 30 spaced hook members per centimeter in a row; and

Art Unit: 3677

(concerning claim 4) the polymeric material is a thermoplastic resin and the hook head has rounded corners (as shown in figs. 1-5, 7 and 8).

Allowable Subject Matter

Claims 5-7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
